English Literature through the Course.

To the above course the degree of B. S. is attached.

Rules and Regulations.

1.—Study hours for collegiate students, 7—12 o'clock, A. M., 2—4 o'clock, P. M., (or a part of the year 3—5 o'clock, P. M.) except Sundays and Saturdays, and 8—9 o'clock, P. M., Saturdays.

2.—Students are not to be absent from their rooms during study hours, nor after study hours at night, without special permission.

3.—No profanity is allowed on the part of students, and all the general rules of good morals and good manners are to be regarded.

4.—All scholars over 14 are to attend chapel prayers on Sabbath evening.

5.—Students are required to go regularly to some designated place of worship every Sabbath morning.

6.—No scholars are to leave town without permission, nor to travel on the Sabbath in going to or from school.

7.—Students will be required to occupy College rooms, unless specially excused.

8.—Bills of attendance will be kept, and every week all unexcused absences will be collated, and placed on permanent record, and each term they will be reported to the parents or guardians.

9.—Scholars in the Academy are required to pass a satisfactory examination in each of the elementary branches, viz: Reading, Spelling, Penmanship, English Grammar, Geography, Mental & Practical Arithmetic, *before finally leaving those studies.* And when any have so passed in any branch they may have a certificate to that effect signed by the teacher and President. A record is kept of all such examinations.

10.—No College student whose general average is less than three can be advanced to the next class.

11.—Any student marked less than three in any study must be re-examined in that study before advancing.

12.—Any person of good moral character may, by vote of the Faculty, attend the recitations in particular branches, provided, on examination he is found ready to pursue those studies; and on completion of any study he may receive a certificate of his proficiency therein. Tuition to correspond with college tuition, per term in advance.

13.—All students are subject to such regulations as the Faculty may from time to time establish.

College Examinations.

College Course.

Freshmen on all the studies of the year at Commencement.
Sophomores " " " two years " "
Juniors " " " two preceeding years "
Seniors on all the studies of Freshmen and Sophomores' years at Christmas.
Seniors on all the studies of two proceeding years at Commencement.

Ladies' Course.

Ladies of 1st year on all the studies of the year at Commencement.
" 2d " " " two years " "
" 3d " " " of 1st and 2d year at Christmas.
" 3d " " " of 3d year at Commencement.

Remarks.

The rules governing the conduct of students will be few as possible, and only such as from time to time seem necessary for their good. A high standard of character and scholarship will be insisted upon. Thorough examinations will be held at the conclusion of each study, and yearly in accordance with the schedule above.

The Institution is under no denominational control or supervision. Its aim is purely educational. It proposes to furnish the facilities for College education which are desirable in any State, but which seem more imperatively necessary in this region, remote from older institutions of other States. While, however, the same general objects are aimed at, it is not in the spirit of servile imitation. Every College should embody clear ideas and have an individual character.

TERMS OF ADMISSION.

As a condition of Admission to College the student must pass a satisfactory examination upon Practical and Mental Arithmetic, Spelling, English Grammar, Geography, History of the United States, Elementary Algebra to Equations of the 2d degree, Latin Grammar and Reader, Nepos, four books of Cæsar, Greek Grammar and Reader. Evidences of good moral character are required. Tuition, $32 per annum, payable quarterly in advance.

Required for entrance upon the Ladies' Course—Latin Grammar and Reader, Nepos, [redacted] or their equivalents, a good knowledge of Practical and Mental Arithmetic, Spelling, English Grammar, Geography, History of the United States, and Elementary Algebra to Equations of the 2d degree. The tuition is $32 per annum, payable quarterly in advance.

Terms of admission to the Scientific Course.—The same as for the Ladies' Course. The tuition also the same.

The Collegiate year begins on the first Wednesday of August, and ends on the first Wednesday of May. There is a vacation of one week at Christmas.

The Academic year extends from the last Wednesday of July to the first Wednesday of May, and is divided into four quarters of 10 weeks each.

First Quarter	beginning	July 29th,
Second	"	"	Oct. 7th,
Third	"	"	Dec. 16th,
Fourth	"	"	Feb. 21st.

There will be a vacation of one week, during Christmas holidays.

The tuition is, for the studies preparatory to College, per quarter	$8.00
Higher English	$7.50
Common English	$5.75
Elementary	$4.50

It is expected that this department will be graded, and a definite course of study marked out.

College students are required to pay $1,00 per annum, library fees, and Academic students will be charged at the same rate per quarter, if they use the library.

It is intended that the study and instruction here given shall cultivate the power of right thinking and ground the student in the principle of right action. This is the great *practical* work of the College. The principles that are at the root of modern progress, originated with SCHOLARS and *thinking* men. Such men the College is designed to train up for the present and future service of the world.

Science, not less than morals and politics, is interested, that this design be adhered to. They both need correct thinkers and well grounded men of action. Great practical questions convulsive society. Speculation threatens to displace science, and theories crowd into the ranks of the knowledges. This is no time to give up the profounder culture of the past. It should rather be perfected. We cannot, therefore, neglect Linguistic, Historical, and Philosophical study—they are too important elements of such a culture. And yet, together with them, and in consistency with the general aim, not only the pure and mixed sciences may be employed as a discipline, but far more attention may be given to the vast field of modern scientific observation than has been general, in our Colleges.

Collections in Natural History, lectures on various subjects by the Faculty and others, will be employed during the Preparatory as well as College course, to awaken an interest in Natural Science, and especially to cultivate the habit of observation, and the higher faculties of generalization.

Opportunity is offered for study independently of the course, and ambitious students, with the helps referred to, and a good library, can study according to their natural taste and talent.

The courses of study are in substance the same as those pursued in Eastern Colleges, and for the young men cover four years; while for such as desire a shorter Course, the scientific course, covering three years, is open. The Ladies' Course covers three years.

Geometry.	Psychology.	Evidences of Nat. and Revealed Religion.

Diplomas are given upon the completion of this course.

Rules and Regulations.

1.—Scholars in the Academy are required to pass a satisfactory Examination in each of the Elementary Branches, viz: Reading, Spelling, Penmanship, English Grammar, Geography, Mental and Practical Arithmetic, *before finally leaving those studies.* And when any have so passed in any branch, they may have a certificate to that effect signed by the teacher and President. A record is kept of all such examinations.

2.—As a condition of admission to College, the student must pass a satisfactory examination upon Practical and Mental Arithmetic. Spelling, English Grammar, Geography, History of the United States, Elementary Algebra to Equations of the 2d degree, Latin Grammar and Reader, portions of Cæsar, Nepos and Virgil, Greek Grammar and Reader. Some study of English Composition is also required preparatory to the College Course. It is necessary that the applicant shall be *sixteen* years of age before admission to the Collegiate Course, and *fifteen* before admission to the other Courses. Evidence of good moral character are required.

A Primary course of Reading through the Third Reader, Spelling, Arithmetic through fundamental Rules, Elementary Geography, together with Printing, Writing and Drawing upon slate or blackboard *must have been pursued before entering the Academy.*

Required for entrance upon the Ladies' Course—Latin Grammar and Reader, or their equivalents, a good knowledge of Practical and Mental Arithmetic, Spelling, English Grammar, Geography, History of the United States and Elementary Algebra to Equations of the 2d degree.

Terms of admission to the Scientific or Normal Course:—The same as for the Ladies' Course. The tuition is also the same.

For admission to advanced standing, an examination will be

required of the student on the studies already passed over by the class he wishes to enter, or their equivalents. Opportunity for examination for admission to College, will be given on the first Tuesday in August, at 9 o'clock, at the College.

3.—Any person of good moral character, may, by vote of the Faculty, attend the recitations in particular branches, provided, on examination he is found ready to pursue those studies; and on completion of any study he may receive a certificate of his proficiency therein. Tuition to correspond with College tuition, per term, in advance.

4.—Examinations will be held at the end of each study, and at end of the year on the studies of the year.

5.—No College student whose general average is less than three, on a scale of five, can be advanced to the next class. Any student marked less than three in any study, must be re-examined in that study before advancing.

6.—Study hours, except Saturday and Sunday, will be—from September 1st to April 1st, from 8 to 12 o'clock A. M., and from 1 to 3 P. M. and from 7 to 9 P. M. During April and May, they will be from 8 to 12 o'clock A. M., and from 1 to 4 P. M., and 8 to 9 P. M. On Saturdays from 8 to 9 P. M. throughout the year.

7.—Students are not to be absent from their rooms during study hours, nor after study hours at night, without special permission.

8.—All scholars over 14, are to attend chapel exercises on Sabbath evening.

9.—Students are required to go regularly to some designated place of worship, every Sabbath morning.

10.—No scholars are to leave town without permission, nor to travel on the Sabbath, in going to or from school.

11.—Bills of attendance will be kept, and every week all unexcused absences will be collated, and placed on permanent record, and each term they will be reported to the parents or guardians.

12.—No profanity is allowed on the part of students, and all the general rules of good morals and good manners are to be regarded.

13.—All students are subject to such regulations as the Faculty may from time to time establish.

REMARKS.

The rules governing the conduct of students will be as few as possible, and only such as from time to time seem necessary for their good. A high standard of character and scholarship will be insisted upon. Thorough examinations will be held at the conclusion of each study, and yearly in accordance with the rule above.

The Institution is under the control or supervision of no denomination. Its aim is purely educational. This implies Christian training and instruction. It proposes to furnish the facilities for College education and instruction which are desirable in any State, but which seem more imperatively necessary in this region, remote from older Institutions of other States. While, however, the same general objects are aimed at, it is not in the spirit of servile imitation. Every College should embody clear ideas and have an individual character.

It is intended that the study and instruction here given shall cultivate the power of right thinking and ground the student in the principle of right action. This is the great *practical* work of the College. The principles that are at the root of modern progress, originated with SCHOLARS and *thinking* men. Such men the College is designed to train up for the present and future service of the world.

Science, not less than morals and politics, is interested that this design be adhered to. They both need correct thinkers and well grounded men of action. Great practical questions convulse society. Speculation threatens to displace science, and theories crowd into the ranks of the knowledges. This is no time to give up the profounder culture of the past. It should rather be perfected. We cannot, therefore, neglect Linguistic, Historical, and Philosophical study—they are too important elements of such a culture. And yet, together with them, and in consistency with the general aim, not only the pure and mixed sciences may be employed as a dicipline, but far more attention may be given to the vast field of modern scientific observation than has been general, in our Colleges.

Collections in Natural History, lectures on various subjects by the Faculty and others, will be employed during the Preparatory as well as College Course, to awaken an interest in Natural Sci-

ence, and especially to cultivate the habit of observation, and the higher faculties of generalization.

Opportunity is offered for study, independently of the course, and ambitious students, with helps referred to, and a good library, can study according to their natural taste and talent.

The courses of study are in substance the same as those pursued in Eastern Colleges, and for the young men cover four years; while for such as desire a shorter Course, the Scientific and Normal Courses, are open. The Ladies' Course covering three years has been carefully prepared to meet the wants of those wishing a really thorough education.

The Normal Course is designed especially to furnish preparation for teaching.

The Literary Societies are an approved method of supplementing the instruction of Teachers, and are an important instrument in education. They receive their charters from the Faculty and are expected to subserve the general purpose of the Institution. The Gamma Sigma was organized during the winter of 1867–8. The Alpha Zeta Alpha a few weeks after, and they are both flourishing and useful.

Classes in Vocal Music are organized at regular intervals for all who wish instruction.

During the past year the number of Preparatory Students has increased, and the grade of the Academy has been raised, thereby excluding primary scholars, for whom provision has been made in the public school.

The completion of the Willamette Valley Railroad to Forest Grove, will soon make the Institution accessible from all parts of the Valley.

The location is beautiful and salubrious. Saloons are excluded by provisions in the deeds which give title to the lands.

The Apparatus and the collections in the department of Natural History are now considerable and are increasing.

The Library numbers about five thousand volumes.

To meet a long felt necessity, the President, by an enlargement of his house, has made provision for boarding young ladies.

Board, including furnished rooms, fuel and lights, $60 per term.

Higher Courses	13
Senior Preparatory	22
Junior Preparatory	24
Pupils in English Studies	96
Total	155

CALENDAR.

The year, in all departments of the Institution, will be divided into three terms, beginning on the first Wednesdays of September, December and March, and will close at Commencement, on the first Wednesday in June. There will be a vacation of one week, during the Christmas holidays.

TUITION.

In the College Courses the tuition is $33 00 per year, payable per term in advance.

Tuition in the Academy.

Preparatory	$33 00 per year.
Common English	24 00 " "

All tuition payable to the Principal per term in advance.

Instruction on the Piano, with use of instrument, $23 00 for twenty-six lessons.

Library fee, to students who use it, $1 00 per year.

Two terms of instruction in vocal music are given during the year, at $2 00 per term.

University Courses of Study.

COLLEGE COURSE.

FIRST YEAR.

FIRST TERM.	SECOND TERM.	THIRD TERM.
Anabasis,	Herodotus.	Livy.
Geometry.	Algebra.	Algebra.
History.	History.	English Literature.

Horace.	Quintilian.	Greek Test. & Drama.
Mechanics.	Optics.	Astronomy.
Chemistry.	Chemistry.	Mineralogy & Geology.

FOURTH YEAR.

FIRST TERM.	SECOND TERM.	THIRD TERM.
Plato and Greek Test.	Psychology.	Evidences of Natural &
Rhetoric.	Moral Philosophy.	Revealed Religion.
Logic.	Constitution of U. S.	Political Economy.

Composition and Elocution throughout the Course.

SCIENTIFIC COURSE.

FIRST YEAR.

FIRST TERM.	SECOND TERM.	THIRD TERM.
Cæsar.	German.	English Literature.
Geometry.	Algebra.	Algebra.
History.	History.	English Composition.

SECOND YEAR.

FIRST TERM.	SECOND TERM.	THIRD TERM.
French.	Constitution of U. S.	French.
Geometry.	Trigonometry.	Conic Sections.
Physiology.	Zoology.	Physiology.

THIRD YEAR.

FIRST TERM.	SECOND TERM.	THIRD TERM.
Logic.	Psychology.	Political Economy.
Mechanics.	Optics.	Astronomy.
Chemistry.	Chemistry.	Geology & Mineralogy.

Composition and Elecution throughout the Course.

The Degree of B. S. is attached to this Course.

LADIES' COURSE.

FIRST YEAR.

FIRST TERM.	SECOND TERM.	THIRD TERM.
Cæsar.	Cicero.	Virgil.
Geometry.	Algebra.	English Composition.
History.	History.	Natural Phiiosophy.

SECOND YEAR.

FIRST TERM.	SECOND TERM.	THIRD TERM.
French.	Constitution of U. S.	English Literature.
Geometry.	Trigonometry.	Elements of Astron'y.
Physiology.	French.	Botany.

THIRD YEAR.

FIRST TERM.	SECOND TERM.	THIRD TERMS.
Logic.	Psychology.	Geology & Mineralogy.
Rhetoric.	Moral Philosophy.	Evidences of Natural &
Chemistry.	Chemistry.	Revealed Religion.

Composition through the Course.

To this Course the Degree of M. S. is attached.

NORMAL COURSE.

FIRST YEAR.

FIRST TERM.	SECOND TERM.	THIRD TERM.
Book Keeping.	Theory & Art of Teach'g	English Composition.
Geometry.	Algebra.	Natural Philosophy.
History.	History.	Algebra.

SECOND YEAR.

FIRST TERM.	SECOND TERM.	THIRD TERM.
Physiology.	Theory & Art of Teach'g	English Literature.
Chemistry.	Chemistry.	Botany.
Geometry.	Psychology.	Evidences of Natural & Revealed Religion.

Diplomas are given upon the completion of this Course.

Rules and Regulations.

1. Candidates for admission to any department of the Institution must give satisfactory testimonials of good moral character.

2. A Primary course of Reading through the Fourth Reader, Spelling, Arithmetic through Fractions and Compound Numbers, Elementary Geography, together with Printing, Writing and Drawing upon Slate or Blackboard, must have been pursued *before* entering the Academy.

3. Scholars in the Academy are required to pass a satisfactory examination in each of the elementary branches before finally leaving those studies. A record is kept of such examinations. Examinations, as far as possible, are in writing.

4. For admission to the Ladies' Course the applicant will be examined upon Latin Grammar, and Reader and Nepos, or their equivalent; a good knowledge of Practical and Mental Arithmetic, Penmanship, Reading and Spelling, English Grammar, Geography, History of the United States, and Elementary Algebra to Equations of the second degree.

5. For admission to the Scientific Course the conditions are the same as for the Ladies' Course.

6. For admission to the Normal Course the conditions are the same, with the omission of Latin.

7. For admission to the College Course the conditions are the same as above, except that the applicant must pass, in languages, an examination also upon portions of Cæsar, Cicero and Virgil; Greek Grammar and Reader. Some study of English Composition, is also an additional requirement.

8. It is necessary that the candidate shall be *sixteen* years of age before admission to the College Course, and *fifteen* before admission to the other courses.

9. For admission to Advanced Standing an examination will be required in the studies already passed over by the Class he wishes to enter, or their equivalents, and a corresponding advancement in age.

10. Examinations for admission will be held on the first Tuesday of September, at 9 o'clock A. M., at the College.

11. Any person otherwise admissable may, by vote of the Faculty, attend the recitations in particular branches, provided he is found prepared to pursue those studies, and on completion of any study he may receive a certificate of his proficiency therein.

12. Examinations will be held at the end of each study, and at the end of the year upon the studies of the year.

13. No College student whose general average is less than "3" on a scale of "5," can be advanced to the next class. Any student marked less than "3" in any examination, must be re-examined before advancing.

14. All students are subject to such regulations as the Faculty shall from time to time establish. The following are, however,

STANDING RULES:

(*a*) The general rules of good manners and good morals are to be regarded.

(*b*) No student is to leave town without permission, or travel on the Sabbath in going to and from school.

(*c*) All students are to go *regularly* to some designated place of worship every Sabbath morning, and all over fifteen years of age to attend Chapel exercises on Sabbath evening.

(*d*) Study hours, except Saturday and Sunday, will be, from September 1st to April 1st, from 8 to 12 o'clock A. M., and from 1 to 3 P. M., and from 7 to 9 P. M. During April and May, they will be from 8 to 12 o'clock A. M., from 1 to 4 P. M., and from 8 to 9 P. M. On Saturday, from 8 to 9 P. M., throughout the year.

(*e*) Bills of attendance will be kept, and every week all unexcused absences will be collated and placed on permanent record, and each term they will be reported to parents or guardians.

REMARKS.

The rules governing the conduct of students will be as few as possible, and only such as from time to time seem necessary for their good. A high standard of character and scholarship will be insisted upon. Thorough examinations will be held at the conclusion of each study, and yearly in accordance with the rule above.

The Institution is under the control or supervision of no denomination. Its aim is purely educational. This implies Christian training and instruction. It proposes to furnish the facilities for College education and instruction which are desirable in any State, but which seem more imperatively necessary in this region, remote from older Institutions of other States. While, however, the same general objects are aimed at, it is not in the spirit of servile imitation. Every College should embody clear ideas and have an individual character.

It is intended that the study and instruction here given shall cultivate the power of right thinking and ground the student in the principle of right action. This is the great *practical* work of the College. The principles that are at the root of modern progress, originated with SCHOLARS and *thinking* men. Such men the College is designed to train up for the present and future service of the world.

Science, not less than morals and politics, is interested that this design be adhered to. They both need correct thinkers and well grounded men of action. Great practical questions convulse society. Speculation threatens to displace science, and theories crowd into the ranks of the knowledges. This is no time to give up the profounder culture of the past. It should rather be perfected. We cannot, therefore, neglect Linguistic, Historical, and Philosophical study—they are too important elements of such a culture. And yet, together with them, and in consistency with the general aim, not only the pure and mixed sciences may be employed as a discipline, but far more attention may be given to the vast field of modern scientific observation than has been general in our Colleges.

Collections in Natural History, lectures on various subjects by the Faculty and others, will be employed during the Preparatory as

well as College Course, to awaken an interest in Natural Science, and to cultivate the habit of observation, and the higher faculties of generalization.

Opportunity is offered for study, independently of the course, and ambitious students, with helps referred to, and a good library, can study according to their natural taste and talent.

The Courses of Study are in substance the same as those pursued in Eastern Colleges, and for the young men cover four years; while for such as desire a shorter Course, the Scientific and Normal Courses, are open. The Ladies' Course, covering three years, has been carefully prepared to meet the wants of those wishing a really thorough education.

The Normal Course is designed especially to furnish preparation for teaching.

The Literary Societies are an approved method of supplementing the instruction of Teachers, and are an important instrument in education. They receive their charters from the Faculty and are expected to subserve the general purpose of the Institution. The Gamma Sigma was organized during the winter of 1867-8. The Alpha Zeta a few weeks after, and they are both flourishing and useful. The ladies have also a Literary Society called the Philomathean.

During the past year the number of Preparatory Students has increased, and the grade of the Academy has been raised, thereby excluding primary scholars, for whom provision has been made in the public school.

The completion of the Oregon Central Railroad to Forest Grove makes the Institution accessible from all parts of the Valley.

The location is beautiful and salubrious. Saloons are excluded by provisions in the deeds which give title to the lands.

The Apparatus and the collections in the Department of Natural History are now considerable and are increasing.

The Library numbers about five thousand volumes, and is open to students.

To meet a long felt necessity, the President, by an enlargement of his house, has made provision for boarding young ladies.

Board, including furnished rooms, fuel and lights, $65 per term.

Recapitulation.

University Students,	24
Academy Students,	123
	147
Deduct name repeated,	1
Total,	146

CALENDAR.

The year, in all Departments of the Institution, will be divided into three terms, beginning on the first Wednesdays of September, December and March, and will close at Commencement, on the first Wednesday in June. There will be a vacation of one week, during the Christmas holidays.

TUITION.

In the University Courses the tuition is $45 per year, and in the Academy $30 per year, payable per term in advance.

Library fee, to students using the Library, is $1 00 per year.

Board can be had in families at from $3 50 to $5 per week.

Instruction in Instrumental Music, and class-drill in Vocal Music, will be given by teachers approved by the Faculty.

Instruction in French and German may also be had from teachers approved by the Faculty.

UNIVERSITY COURSES OF STUDY.

COLLEGE COURSE.

FIRST YEAR.

FIRST TERM.	SECOND TERM.	THIRD TERM.
Anabasis,	Herodotus,	Livy,
Geometry,	Algebra,	Algebra,
History.	History.	English Literature.

SECOND YEAR.

FIRST TERM.	SECOND TERM.	THIRD TERM.
Tacitus,	Homer,	Thucydides,
Geometry,	Trigonometry,	Conic Sections.
Physiology.	Zoology.	Botany.

THIRD YEAR.

FIRST TERM.	SECOND TERM.	THIRD TERM.
Horace,	Quintilian,	Greek Test. & Drama,
Mechanics,	Optics,	Astronomy,
Chemistry.	Chemistry.	Mineralogy and Geology.

FOURTH YEAR.

FIRST TERM.	SECOND TERM.	THIRD TERM.
Plato and Greek Testament,	Psychology,	Evidences of Natural and Re-
Rhetoric,	Moral Philosophy,	vealed Religion,
Logic.	Constitution of U. S.	Political Economy.

Composition and Elocution throughout the Course.

SCIENTIFIC COURSE.

FIRST YEAR.

FIRST TERM.	SECOND TERM.	THIRD TERM.
Cæsar,	Pedagogics,	English Literature,
Geometry,	Algebra,	Algebra,
History,	History.	English Composition.

SECOND YEAR.

FIRST TERM.	SECOND TERM.	THIRD TERM.
Rhetoric,	Constitution of U. S.,	Evidences of Christianity,
Geometry,	Trigonometry,	Conic Sections,
Physiology.	Zoology.	Botany.

THIRD YEAR.

FIRST TERM.	SECOND TERM.	THIRD TERM.
Logic.	Psychology,	Political Economy,
Mechanics,	Optics,	Astronomy,
Chemistry.	Chemistry.	Geology and Mineralogy.

Composition and Elocution throughout the Course.

The Degree of B. S. is attached to this Course.

LADIES' COURSE.

FIRST TERM.	SECOND TERM.	THIRD TERM.
Cæsar,	Cicero,	Virgil,
Geometry,	Algebra,	English Composition,
History.	History.	Natural Philosophy.

SECOND YEAR.

FIRST TERM.	SECOND TERM.	THIRD TERM.
Horace,	Constitution of U. S.	English Literature,

History.	History.	Algebra.

SECOND YEAR.

FIRST TERM.	SECOND TERM.	THIRD TERM.
Physiology,	Constitution of U. S.,	English Literature,
Chemistry,	Chemistry,	Botany,
Geometry.	Psychology.	Evidences of Natural and Revealed Religion.

Diplomas are given upon the completion of this Course.

RULES AND REGULATIONS.

1. Candidates for admission to any department of the Institution must give satisfactory testimonials of good moral character.

2. A Primary Course of Reading through the Fourth Reader, Spelling, Arithmetic through Fractions and Compound Numbers, Elementary Geography, together with Printing, Writing and Drawing upon Slate or Blackboard, must have been pursued before entering the Academy.

3. Scholars in the Academy are required to pass a satisfactory examination in each of the elementary branches before finally leaving those studies. A record is kept of such examinations. Examinations, as far as possible, are in writing.

4. For admission to the Ladies' Course the applicant will be examined upon Latin Grammar, and Reader and Nepos, or their equivalent; a good Knowledge of Practical and Mental Arithmetic, Penmanship, Reading and Spelling, English Grammar, Geography, History of the United States, and Elementary Algebra to Equations of the second degree.

5. For admission to the Scientific Course the conditions are the same as for the Ladies' Course.

6. For admission to the Normal Course the conditions are the same, with the omission of Latin.

7. For admission to the College Course the conditions are the same as above, except that the applicant must pass, in languages, an examination also upon portions of Cæsar, Cicero and Virgil, and Greek Grammar and Reader. Some study of English Composition is also an additional requirement.

8. It is necessary that the candidate shall be fifteen years of age before admission to any of the University Courses of Study.

8. For admission to Advanced Standing an examination will be required in the studies already passed over by the Class he wishes to enter, or their equivalents, and a corresponding advancement in age.

10. Examinations for admission will be held on the first Tuesday of September, at 9 o'clock A. M., at the College.

11. Any person, otherwise admissable, may, by vote of the Faculty, attend the recitations in particular branches, provided he is found prepared to pursue those studies, and on completion of any study he may receive a certificate of his proficiency therein.

12. Examinations will be held at the end of each study, and at the end of the year upon the studies of the last term, and upon such studies of the previous terms as the Faculty shall direct.

13. No College student whose general average is less than "3" on a scale of "5" can be advanced to the next class. Any student

marked less than "3" in any examination must be re-examined before advancing.

14. All students are subject to such regulations as the Faculty shall from time to time establish. The following are, however,

---

STANDING RULES.

(A) The general rules of good manners and good morals are to be regarded.

(B) No student is to leave town without permission, or travel on the Sabbath in going to and from school.

(C) All students are to go regularly to some designated place of worship every Sabbath morning, and all over fifteen years of age are to attend Chapel exercises on Sabbath evening.

(D) Study hours, excepting Saturday and Sunday, from September 1st to April 1st, will be from 8 to 12 A. M., and from 1 to 3 P. M., and from 7 to 9 P. M. During April and May they will be from 8 to 12 o'clock A. M., from 1 to 4 P. M., and from 8 to 9 P. M. On Saturday, from 8 to 9 P. M., throughout the year.

(E) Bills of attendance will be kept, and every week all unexcused absences will be collated and placed on permanent record, and they will be reported to parents or guardians at any time upon application.

(F) Students are not to change boarding places without permission of the Faculty.

REMARKS.

The rules governing the conduct of students will be as few as possible, and only such as from time to time seem necessary for their good. A high standard of character and scholarship will be insisted upon. Thorough examinations will be held at the conclusion of each study, and yearly, in accordance with the rule above.

The Institution is under the control or supervision of no denomination. Its aim is purely educational. This implies Christian training and instruction. It proposes to furnish the facilities for College education and instruction which are desirable in any State, but which seem more imperatively necessary in this region, remote from older Institutions of other States. While, however, the same general objects are aimed at, it is not in the spirit of servile imitation. Every College should embody clear ideas and have an individual character.

It is intended that the study and instruction here given shall cultivate the power of right thinking and ground the student in the principles of right action. This is the great PRACTICAL work of the College. The principles which are at the root of modern progress originated with SCHOLARS and THINKING men. Such men the College is designed to train up for the present and future service of the world.

Science, not less than morals and politics, is interested that this design be adhered to. They both need correct thinkers and well-grounded men of action. Great practical questions convulse society. Speculation threatens to displace science, and theories crowd into the ranks of the knowledges. This is no time to give up the profound culture of the past. It should rather be perfected. We cannot, therefore, neglect Linguistic, Historical and Philosophical studies — they are too important elements of such a culture. And yet, together with them, and in consistency with the general aim, not only the pure and mixed sciences may be employed as a discipline, but far more attention may be given to the vast field of modern scientific observation than has been general in our Colleges.

By the new arrangement in Professorships, the Rhetorical Department, Rhetoric and History, secure a greater share of attention than in the past, and more nearly what their relative importance demands. By the appointment of Rev. Thomas Condon to the charge of the science of Geology, the Scientific Department is strengthened, giving the Professor in that Department time for more thorough investigation and larger work in other fields.

This advance in force and in prospective efficiency the Trustees intend shall be followed by other like advances, as the fund of the Institution, already amounting to $65,000, shall be enlarged. Considerable enlargement in this fund is expected in coming years. Improvement in buildings is planned to be made this season.

Collections in Natural History, lectures on various subjects, by the Faculty and others, will be employed during the Preparatory as

well as College Course, to awaken an interest in Natural Science, and to cultivate the habit of observation, and the higher faculties of generalization,

Opportunity is offered for study, independently of the Course, and ambitious students, with helps referred to, and a good library, can study according to their natural taste and talent.

The Courses of Study are in substance the same as those pursued in Eastern Colleges, and for the young men cover four years; while for such as desire a shorter Course the Scientific and Normal Courses are open. The Ladies' Course, covering three years, has been carefully prepared to meet the wants of those wishing a really thorough education.

The Normal Course is designed especially to furnish preparation for teaching.

The Literary Societies are an approved method of supplementing the instruction of Teachers, and are an important instrument in education. They receive their charters from the Faculty and are expected to subserve the general purpose of the Institution. The Gamma Sigma was organized during the winter of 1867–8; the Alpha Zeta a few weeks after; and they are both flourishing and useful. The ladies have also a Literary Society called the Philomathean.

During the past year the number of Preparatory Students has increased, and the grade of the Academy has been raised, thereby excluding primary scholars, for whom provision has been made in the public school.

The completion of the Oregon Central Railroad to Forest Grove makes the Institution accessible from all parts of the Valley.

The location is beautiful and salubrious. Saloons are excluded by provisions in the deeds which give title to the lands.

The Apparatus and the collections in the Department of Natural History are now considerable, and are increasing.

The Library numbers about five thousand volumes, and is open to students.

(D) Study hours, excepting Saturday and Sunday, from September 1st to April 1st, will be from 8 to 12 A. M., and from 1 to 3 P. M., and from 7 to 9 P. M. During April and May they will be from 8 to 12 o'clock A. M., from 1 to 4 P. M., and from 8 to 9 P. M. On Saturday, from 8 to 9 P. M., throughout the year.

(E) Bills of attendance will be kept, and every week all unexcused absences will be collated and placed on permanent record, and they will be reported to parents or guardians at any time upon application.

(F) Students are not to change boarding places without permision of the Faculty.

REMARKS.

The rules governing the conduct of students will be as few as possible, and only such as from time to time seem necessary for their good. A high standard of character and scholarship will be insisted upon. Thorough examinations will be held at the conclusion of each study, and yearly, in accordance with the rule above.

The Institution is under the control or supervision of no denomination. It aims to give not sectarian, but thoroughly Christian instruction and training.

It is intended that the study and instruction here given shall cultivate the power of right thinking, and ground the student in the principles of right action. This is the great PRACTICAL work of the College. The principles which are at the root of modern progress originated with SCHOLARS and THINKING men. Such men the College is designed to train up for the present and future service of the world.

Science, not less than morals and politics, is interested that this design be adhered to. They both need correct thinkers and well-grounded men of action. Great practical questions convulse soci-

ety. Speculation threatens to displace science, and theories crowd into the ranks of the knowledges. This is no time to give up the profound culture of the past. It should rather be perfected. We cannot, therefore, neglect Linguistic, Historical and Philosophical studies—they are too important elements of such a culture. And yet, together with them, and in consistency with the general aim, not only the pure and mixed sciences may be employed as a discipline, but far more attention may be given to the vast field of modern scientific observation than has been general in our Colleges.

By the new arrangement in Professorships, the Rhetorical Department, Rhetoric and History, secure a greater share of attention than in the past, and more nearly what their relative importance demands. By the appointment of Rev. Thomas Condon to the charge of the science of Geology, the Scientific Department is strengthened, giving the Professor in that Department time for more thorough investigation and larger work in other fields.

This advance in force and in prospective efficiency the Trustees intend shall be followed by other like advances, as the fund of the Institution, already amounting to $65,000, shall be enlarged. Considerable enlargement in this fund is expected in coming years. Improvement in buildings is planned to be made this season.

Collections in Natural History, lectures on various subjects, by the Faculty and others, will be employed during the Preparatory as

well as University Courses, to awaken an interest in Natural Science, and to cultivate the habit of observation, and the higher faculties of generalization.

Opportunity is offered for study, independently of the Course, and ambitious students, with helps referred to, and a good library, can study according to their natural taste and talent.

The Courses of Study are in substance the same as those pursued in Eastern Colleges, and for the young men cover four years; while for such as desire a shorter Course the Scientific and Normal Courses are open. The Ladies' Course, covering three years, has been carefully prepared to meet the wants of those wishing a really thorough education.

The Normal Course is designed especially to furnish preparation for teaching.

The Literary Societies are an approved method of supplementing the instruction of teachers, and are an important instrument in education. They receive their charters from the Faculty and are expected to subserve the general purpose of the Institution. The Gamma Sigma was organized during the winter of 1867–8; the Alpha Zeta a few weeks after; and they are both flourishing and useful. The ladies have also a Literary Society called the Philomathean.

The completion of the Oregon Central Railroad to Forest Grove makes the Institution accessible from all parts of the Valley.

The location is beautiful and salubrious. Saloons are excluded by provisions in the deeds which give title to the lands.

The Apparatus and the collections in the Department of Natural History are now considerable, and are increasing.

The Library numbers about five thousand volumes, and is open to students.
